Updated Myers' Psychology for the AP® Course David G. Myers, C. Nathan DeWall, 2020-06-02 Announcing a new Myers/DeWall text, created specifically for the Fall 2019 AP® course framework! You are likely familiar with the name Dr. David G. Myers. Now, he and his new co-author, Nathan DeWall, bring you a book that will allow you to use College Board's new Personal Progress Checks and Dashboard more effectively. This updated edition includes 100% of the new course content in the new nine-unit structure. All teacher and student resources will also be updated to correlate to the new student edition; this includes the TE, TRFD, TB, Strive, and LaunchPad. Everything will publish in summer 2020 such that you can use this new program for Fall 2020 classes. If you're not familiar with Myers/DeWall texts, you are in for a treat! Drs. Myers and DeWall share a passion for the teaching of psychological science through wit, humor, and the telling of poignant personal

stories (individually identified in the text by the use of each author's initials [DM and ND]). Through close collaboration, these authors produce a unified voice that will teach, illuminate, and inspire your AP® students.

Cities in Contemporary Africa M. Murray,G. Myers,2007-01-08 This book explains how and why cities on the African continent have grown at such a rapid pace, how municipal authorities have tried to cope with this massive influx of people, and how long-time urban residents and newcomers interact, negotiate, and struggle over access to limited resources.

Psychology In Modules David G. Myers,2009-09-28 This version of the main text breaks down the chapters into shorter modules, for more accessibility. The smaller chunks allow students to better grasp and explore psychological concepts. The modules also allow more flexibility in teaching, as cross-references to other chapters have been replaced with brief explanations.

Salivary Gland Disorders Eugene N. Myers,Robert L. Ferris,2007-08-14 Co-edited by Eugene N. Myers, a world-famous expert in the field, this has got to be the last word on salivary gland disorders. The disorders themselves cover a broad array of diseases, both benign and malignant. Thus, the contents of this book have been organized to reflect the diverse nature of salivary gland anatomy, physiology, and dysfunction in various states of disease. In this way, the evolution of the field and its diagnostic and therapeutic management are better demonstrated. Covering everything from practical diagnosis to gland tumor therapy, this really is a crucial work for any surgeon working in the facial or neck regions.

Essays in Socio-Economics Amitai Etzioni,2013-03-09 These essays deal with various aspects of a new, rising field, socio economics. The field is seeking to combine the variables studied by neoclassical economists with those typically studied by other social sciences. The combination is expected to provide a better understanding of economic behavior and the economy as well as society; make more reliable predictions; and be more in line with normative values we seek to uphold. The new field, though, may be less elegant mathematically and possibly less parsimonious than neoclassical economics. Some of my ideas on this subject are included in a previously published book, *The Moral Dimension: Toward A New Economics* (New York: The Free Press, 1988). They also led to a formation of an international society of several thousand scholars who are interested in the field, the Society for the Advancement of Socio-Economics. The essays at hand are in effect grouped. The first two, previously published respectively in the *Journal of Economic Psychology* and *Business Ethics Quarterly*, reflect my most recent thinking. They both have a utopian streak that may stand out especially in these days when unfeathered capitalism is the rage. The first points to people, who far from making consuming ever more their life's project, seek a less affluent way of life. It examines the psychological foundations and the social consequences of such an approach.

Exploring Psychology, Sixth Edition, in Modules David G. Myers,2004-12-07 The success of the modular version of David Myers's bestselling brief text, *Exploring Psychology*, proves the author's longheld belief (supported by independent research) that for a number of students, a text comprised of 45 15-page chapters is more effective than one of 15 45-page

chapters. Exploring Psychology, Sixth Edition, in Modules includes all the features and up-to-date content of the current edition of Exploring Psychology organized into 45 modules. It is accompanied by its own expansive variety of media and supplements similar to the Exploring Psychology package, also reorganized to match the modular format. This is NOT a brief version of Psychology, Seventh Edition, in Modules. Rather, this text is a MODULARIZED version of Exploring Psychology, Sixth Edition.

International Handbook of Psychology Learning and Teaching Joerg Zumbach, Douglas A. Bernstein, Susanne Narciss, Giuseppina Marsico, 2022-12-16 The International Handbook of Psychology Learning and Teaching is a reference work for psychology learning and teaching worldwide that takes a multi-faceted approach and includes national, international, and intercultural perspectives. Whether readers are interested in the basics of how and what to teach, in training psychology teachers, in taking steps to improve their own teaching, or in planning or implementing research on psychology learning and teaching, this handbook will provide an excellent place to start. Chapters address ideas, issues, and innovations in the teaching of all psychology courses, whether offered in psychology programs or as part of curricula in other disciplines. The book also presents reviews of relevant literature and best practices related to everything from the basics of course organization to the use of teaching technology. Three major sections consisting of several chapters each address “Teaching Psychology in Tertiary (Higher) Education”, “Psychology Learning and Teaching for All Audiences”, and “General Educational and Instructional Approaches to Psychology Learning and Teaching”.

Archaeologies of Internment Adrian Myers, Gabriel Moshenska, 2011-05-24 The internment of civilian and military prisoners became an increasingly common feature of conflicts in the twentieth century and into the twenty-first. Prison camps, though often hastily constructed and just as quickly destroyed, have left their marks in the archaeological record. Due to both their temporary nature and their often sensitive political contexts, places of internment present a unique challenge to archaeologists and heritage managers. As archaeologists have begun to explore the material remains of internment using a range of methods, these interdisciplinary studies have demonstrated the potential to connect individual memories and historical debates to the fragmentary material remains. Archaeologies of Internment brings together in one volume a range of methodological and theoretical approaches to this developing field. The contributions are geographically and temporally diverse, ranging from Second World War internment in Europe and the USA to prison islands of the Greek Civil War, South

African labor camps, and the secret detention centers of the Argentinean Junta and the East German Stasi. These studies have powerful social, cultural, political, and emotive implications, particularly in societies in which historical narratives of oppression and genocide have themselves been suppressed. By repopulating the historical narratives with individuals and grounding them in the material remains, it is hoped that they might become, at least in some cases, archaeologies of liberation.

Osteosarcopenia: Bone, Muscle and Fat Interactions Gustavo Duque, 2019-11-06 This edited work presents the most current evidence on osteosarcopenia from bench to bedside, which is expected to facilitate the understanding of this syndrome and to develop preventive and therapeutic strategies. With our aging population, chronic diseases such as osteoporosis and sarcopenia are becoming highly prevalent. Fortunately, our understanding of the bone and muscle interactions has increased in recent years. This has allowed to the coining of the term osteosarcopenia to describe a syndrome in which these two diseases overlap. This overlap between osteoporosis and sarcopenia has major negative effects not only on our older adults but also on health systems worldwide. Readers will find a highly translational approach that starts with a summary of recent discoveries on stem cells biology, muscle and bone interactions - including the role of local bone and muscle fat - followed by comprehensive reviews on myokines (i.e. myostatin), osteokines (i.e. osteocalcin) and adipokines (i.e. interleukins) as major players and determinants of bone and muscle loss with aging. In addition, the role of sex steroids (i.e. estrogens, androgens), and calciotropic hormones (i.e. parathyroid hormone, vitamin D) in the pathogenesis of this syndrome is also reviewed. Moreover, using practical diagnostic and therapeutic tips, this book summarizes the clinical characteristics of osteosarcopenic patients thus facilitating the diagnosis and treatment of this syndrome in clinical practice. Finally, the book presents the case for the Falls and Fractures Clinic as the optimal model of care for this syndrome, aimed to avoid fragmentation and optimize osteosarcopenia care, and simultaneously prevent falls and fractures in older persons. This book offers relevant information on the mechanisms of osteosarcopenia, and a practical guide on how to identify and treat this geriatric syndrome and its adverse outcomes, which are dramatically affecting our aging population. The work is written by leaders in the field and is especially suited not only to any researcher in the musculoskeletal arena but also to medical specialists and allied health professionals involved in the care of older persons.

Sourcebook of Social Support and Personality Gregory R. Pierce, 1997-07-31 The Sourcebook gives special attention to the complexity of the social support construct, expanding the field's theoretical base by reappraising social support research in the context of findings from other fields of psychology & related disciplines.

Teaching Creative Writing Heather Beck, 2012-10-21 Teaching Creative Writing includes lively contributions from over two dozen leading practitioners in the field. Topics addressed include history of Creative Writing, workshops, undergraduate, postgraduate, reflective activities, assessment, critical theory, and information technology.

Behavior and Environment A. Esser, 2012-12-06 The International Symposium on The Use of Space by Animals and Men, sponsored by the Animal Behavior Society, took place at the 135th Annual Meeting of the AAAS in Dallas, Texas, on December 29-31, 1968. This book presents the text of all papers and edited discussions, as well as the contributions made by several individuals who were unable to attend the Symposium. The idea of holding the Symposium evolved following my presentation of a paper to the Animal Behavior Society in 1965 [2] on the use of space by psychiatric patients. Members in attendance at that session, chaired by G. Gottlieb, shared his interest in my compilation of human data presented in a measurable spatial context. This pleasant experience persuaded me that a discussion of space might be shared as a frame of reference which could open avenues of communication between behavioral scientists, the design community, and the decision makers in our society.

Psychology David G. Myers, 2003-06-06 This new edition continues the story of psychology with added research and enhanced content from the most dynamic areas of the field—cognition, gender and diversity studies, neuroscience and more, while at the same time using the most effective teaching approaches and learning tools.

Secondary Analysis of Electronic Health Records MIT Critical Data, 2016-09-09 This book trains the next generation of scientists representing different disciplines to leverage the data generated during routine patient care. It formulates a more complete lexicon of evidence-based recommendations and support shared, ethical decision making by doctors with their patients. Diagnostic and therapeutic technologies continue to evolve rapidly, and both individual practitioners and clinical teams face increasingly complex ethical decisions. Unfortunately, the current state of medical knowledge does not provide the guidance to make the majority of clinical decisions on the basis of evidence. The present research infrastructure is inefficient and frequently produces unreliable results that cannot be replicated. Even randomized controlled trials (RCTs), the traditional gold standards of the research reliability hierarchy, are not without limitations. They can be costly, labor intensive, and slow, and can return results that are seldom generalizable to every patient population. Furthermore, many pertinent but unresolved clinical and medical systems issues do not seem to have attracted the interest of the research enterprise, which has come to focus instead on cellular and molecular investigations and single-agent (e.g., a drug or device) effects. For clinicians, the end result is a bit of a “data desert” when it comes to making decisions. The new research infrastructure proposed in this book will help the medical profession to make ethically sound and well informed decisions for their patients.

Handbook of Evidence-Based Interventions for Children and Adolescents Lea A. Theodore, PhD, 2016-07-20 A

step-by-step resource for treating more than 40 prevalent issues with proven strategies This comprehensive handbook for evidence-based mental health and learning interventions with children and adolescents is distinguished by its explicit yet concise guidance on implementation in practice. With a compendium of proven strategies for resolving more than 40 of the most pressing and prevalent issues facing young people, the book provides immediate guidance and uniform step-by-step instructions for resolving issues ranging from psychopathological disorders to academic problems. Busy academics, practitioners, and trainees in schools and outpatient clinical settings will find this resource to be an invaluable desktop reference for facilitating well-informed decision-making. Unlike other volumes that ignore or merely reference the evidence base of various interventions, this book focuses on providing immediate, empirically supported guidance for putting these strategies into direct practice. Issues covered include crisis interventions and response, social and emotional issues, academic/learning issues, psychopathological disorders, neuropsychological disorders, and the behavioral management of childhood health issues. Each chapter follows a consistent format including a brief description of the problem and associated characteristics, etiology and contributing factors, and three evidence-based, step-by-step sets of instructions for implementation. Additionally, each chapter provides several websites offering further information about the topic. Featuring contributions from leading scholars and practitioners on each issue covered, this book will be a valuable resource for child clinical and school psychologists, counselors, social workers, and therapists as well as other health and mental health professionals whose primary practice is with children and adolescents. Key Features: Demonstrates step-by-step, evidence-based interventions for more than 40 common childhood issues Provides treatment procedures that can be immediately put into practice Covers a wide range of mental health and academic/learning issues for children and adolescents Relevance for both school-based and clinically-based practice Includes contributions by noted experts in the field
