*Twenty Years of Education Transformation in Gauteng 1994 to 2014* Maringe, Felix, Prew, Martin, 2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

**Change Management in TVET Colleges** Andre Kraak, Andrew Paterson, 2016-07-25 The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The triple challenge of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers.

*The Art of Manipulating Fabric* Colette Wolff,1996-10-01 The possibilities for three-dimensional manipulation of fabric - gathering, pleating, tucking, shirring, and quilting woven materials - are seemingly endless. To describe them all would be to describe the entire history of sewing. In *The Art of manipulating Fabric*, Colette Wolff has set herself just this task, and she succeeds brilliantly. Working from the simplest possible form - a flat piece of cloth and a threaded needle - she categorizes all major dimensional techniques, show how they are related, and give examples of variations both traditional and modern. The result is an encyclopedia of techniques that resurface, reshape, restructure and reconstruct fabric. • More than 350 diagrams support the extensive how-tos, organized into broad general categories, then specific sub-techniques • Handsome photos galleries showcase the breathtaking possibilities in each technique and aid visual understanding by emphasizing the sculptured fabric surface with light and shadow • Textile artists and quilters, as well as garment and home decor sewers, will expand their design horizons with the almost limitless effects that can be achieved.
